11-T6C

:Structure

Mucosa

Sub mucosa

Muscles : longitudinal / circular

= striated $\frac{1}{3}$ Sup.

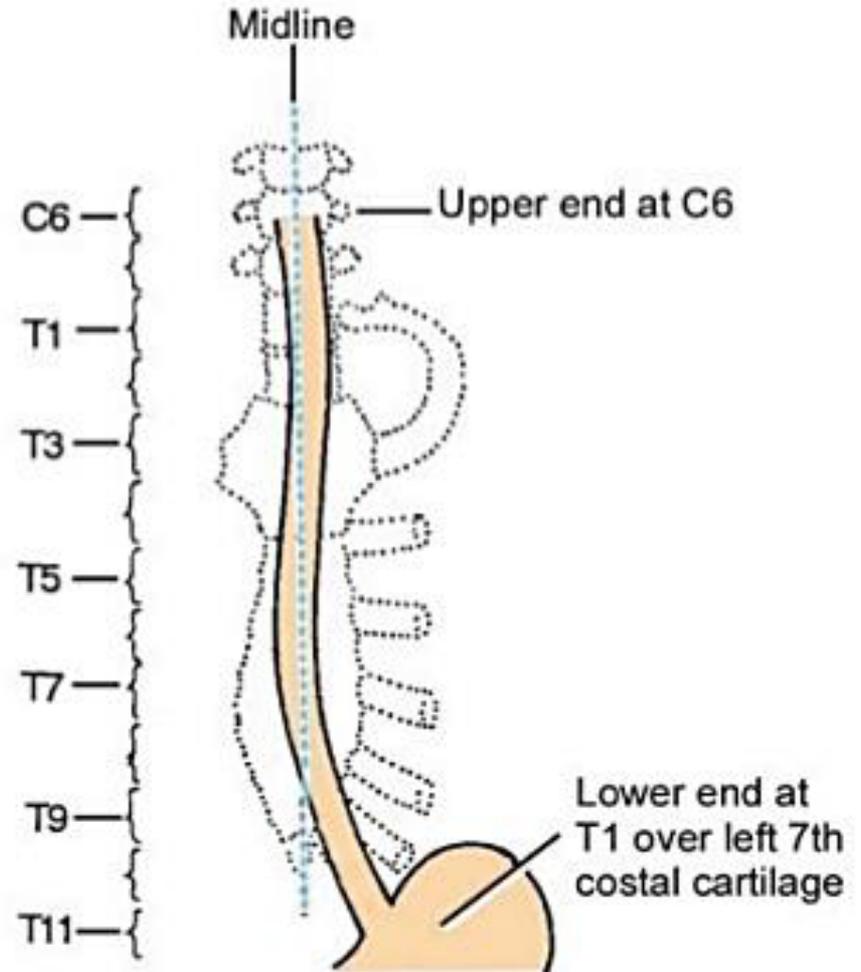

= striated + smooth $\frac{1}{3}$ Middle

= smooth $\frac{1}{3}$ Inf.

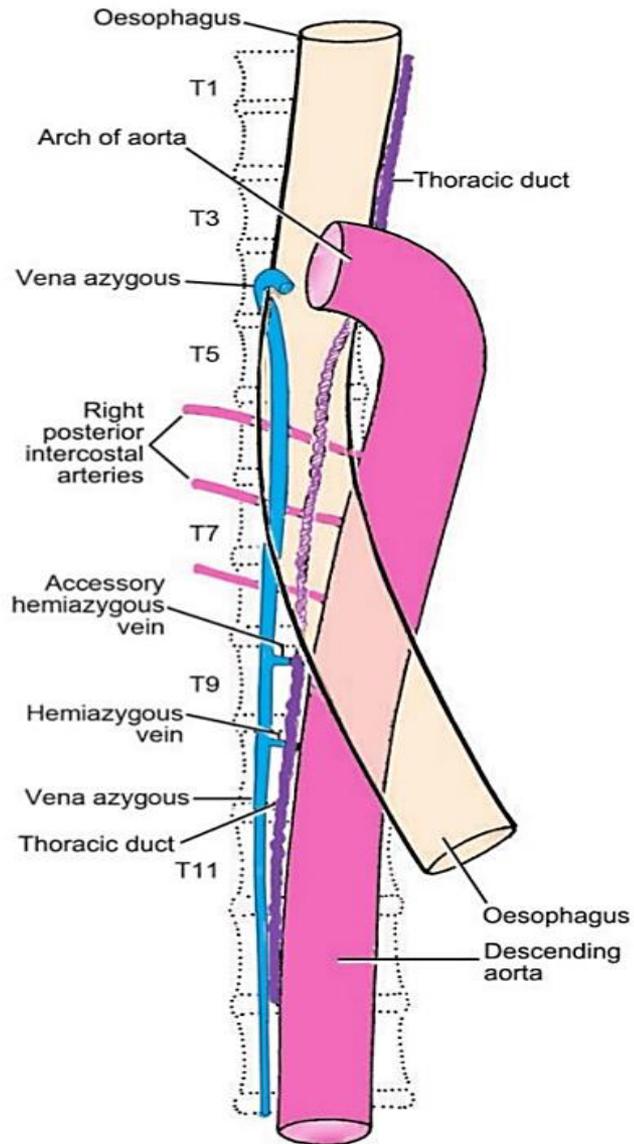

:Nerve

Parasympathetic: mucosal secretion

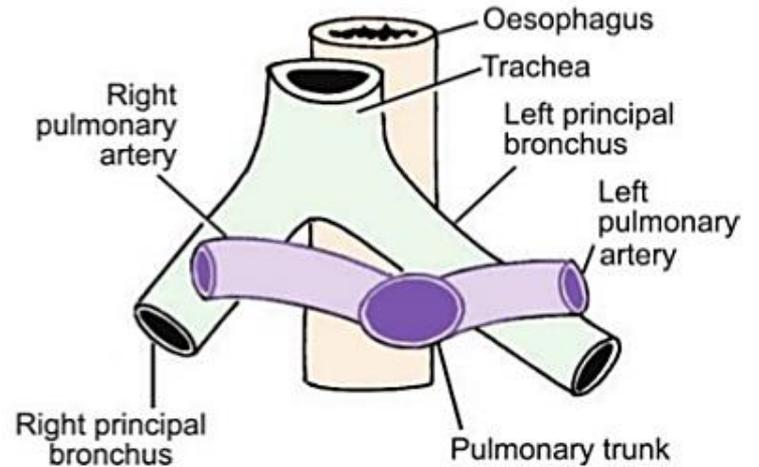

Sympathetic: vasomotor

22.1: Lateral curvatures of the oesophagus and the levels of its upper and lower ends

22.3: Scheme to show posterior relations of the oesophagus (which is drawn as if transparent)

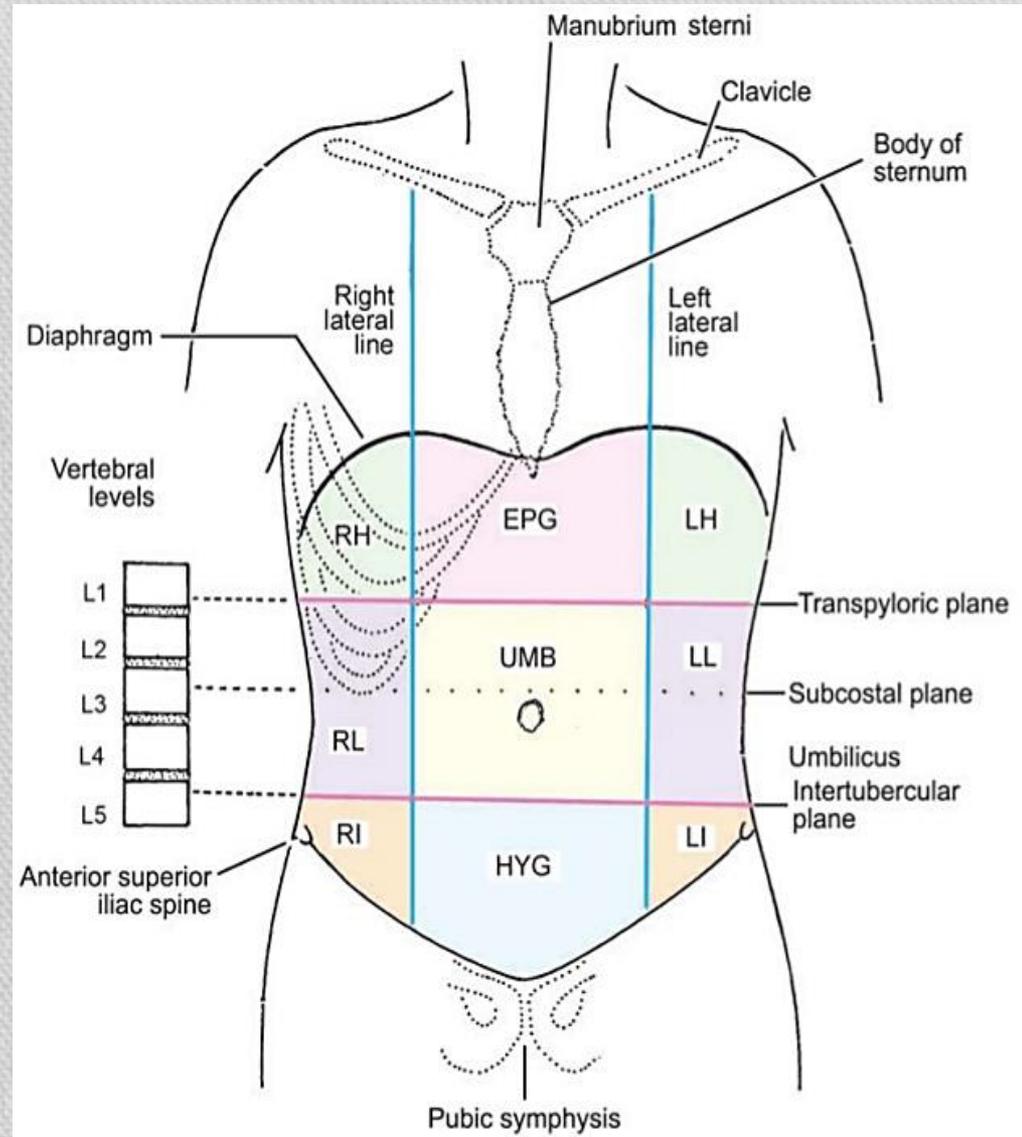

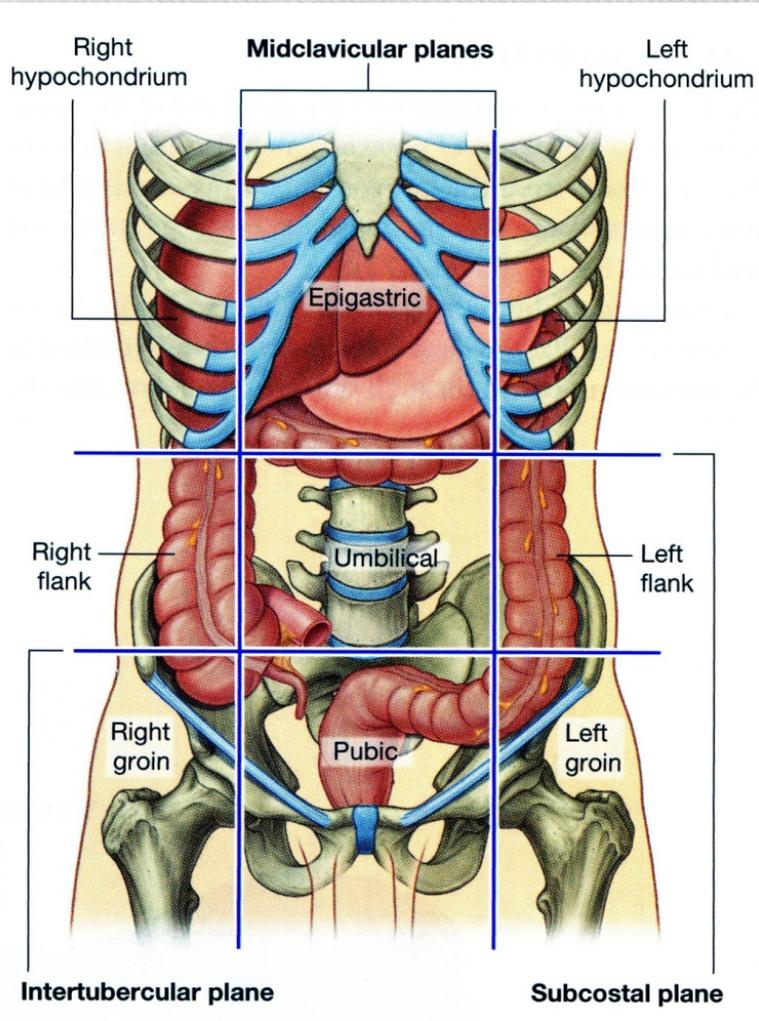

22.2: Scheme to show that the oesophagus is crossed by the left principal bronchus and the right pulmonary artery

:Esophagus stenosis

- Attach to pharynx .B
- Arch of aorta + lf. Bronchus .Г
- Diaphragm .Д

Umbilical
 Epigastric
 Hypogastric
 Rt. Lf. Hypochondriac
 Rt. Lf. Lumbar
 Rt. Lf. Iliac

25.5: Regions of the abdomen and the lines demarcating them

:Peritoneum

Parietal layer

Visceral layer

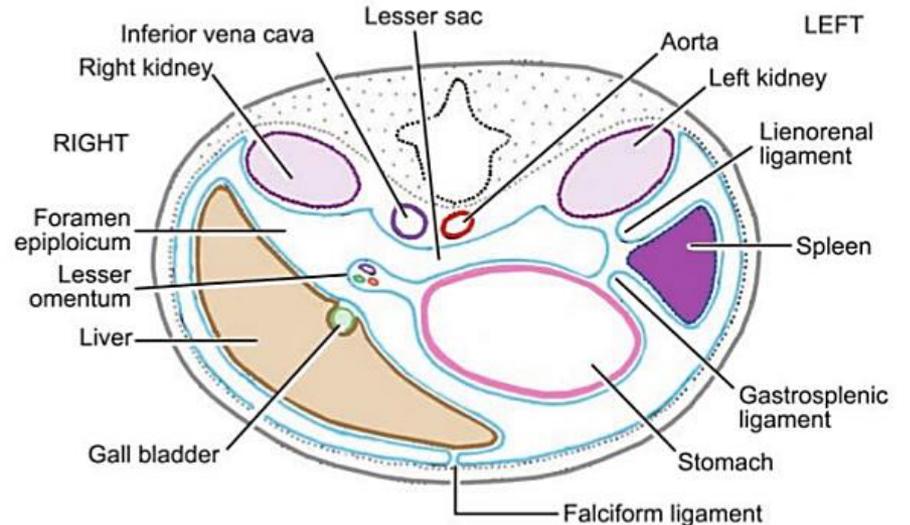

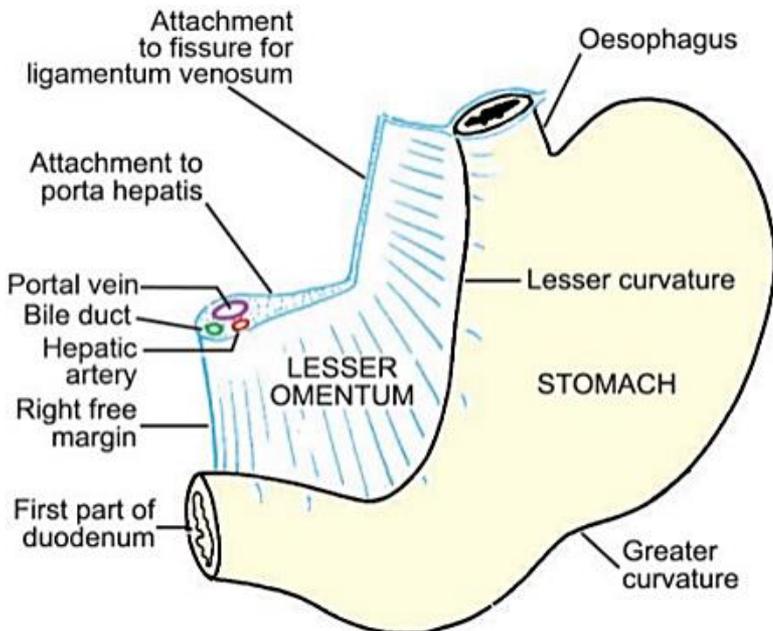

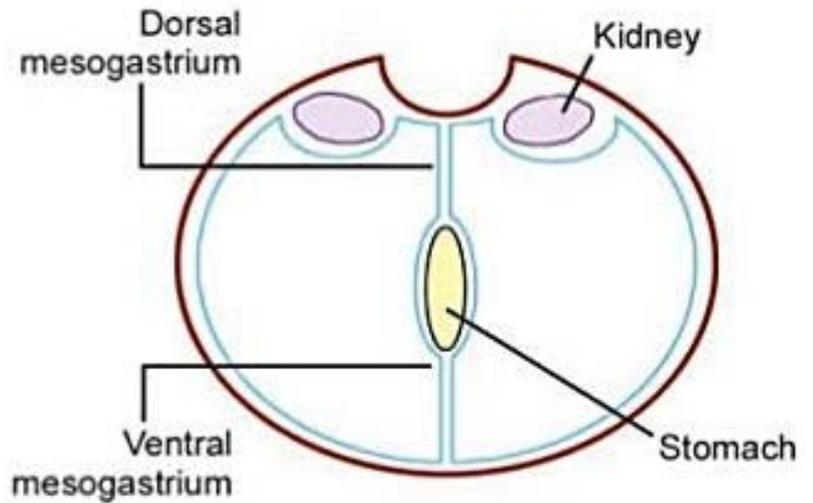

Intraperitoneal

Retroperitoneal

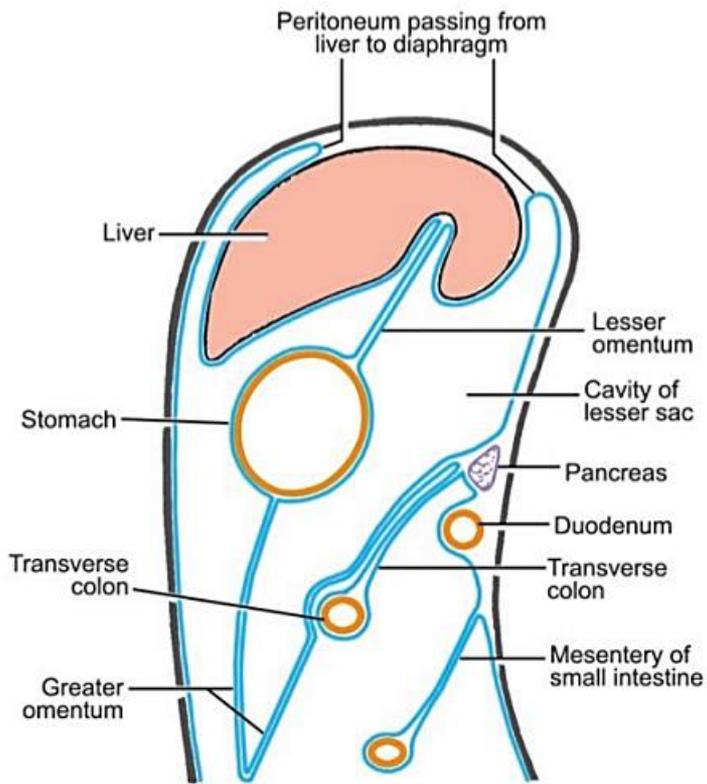

Meso

Omentum: greater / lesser

Peritoneal ligaments: falciform /gastrosplenic

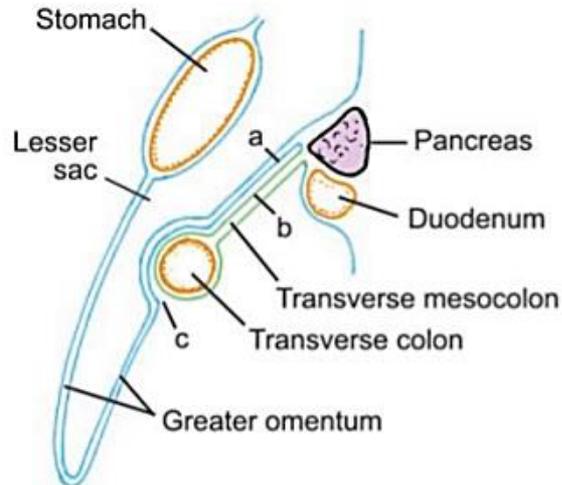

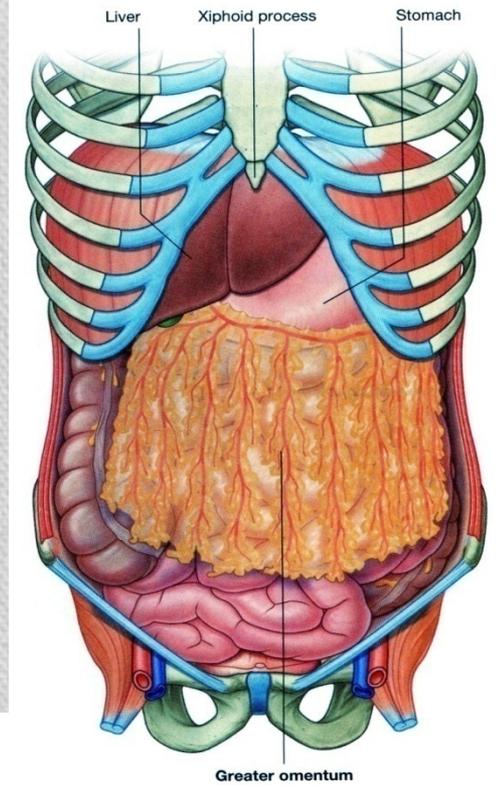

33.36: Transverse section across abdomen at the level of the foramen epiploicum to show peritoneal reflections

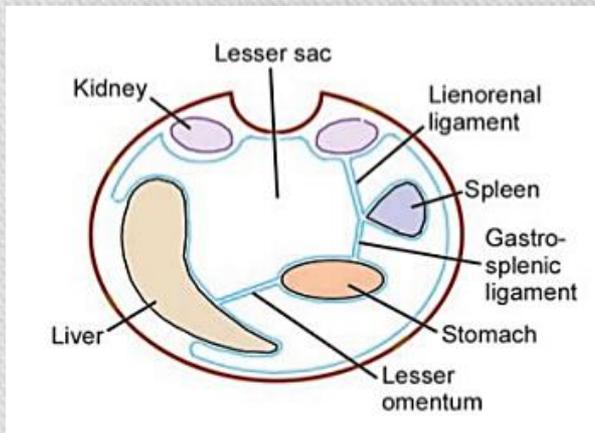

33.31: Schematic sagittal section through the abdomen to show some features of peritoneum

Greater sac
Lesser sac
Winslo foramen

27.16: Scheme to show the relationship of the transverse mesocolon to the greater omentum

:Stomach

1-L11T

cm 25

J shape

:Surfaces

Ant. Superior

Post. Superior

:Orifice

Cardiac = physiologic sphincter

Pyloric = anatomic sphincter

Lesser curvature / angular incisure

Greater curvature / cardiac notch

Fundus

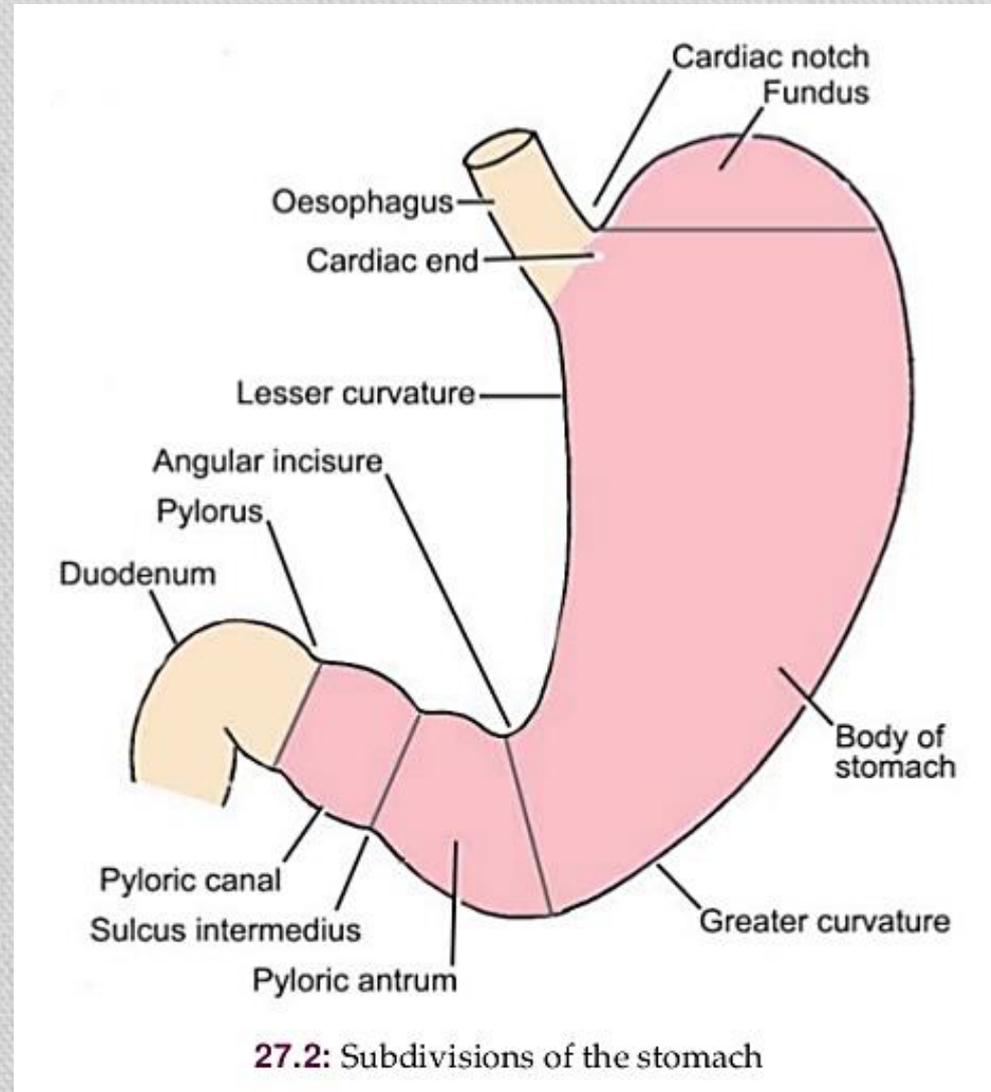

Body

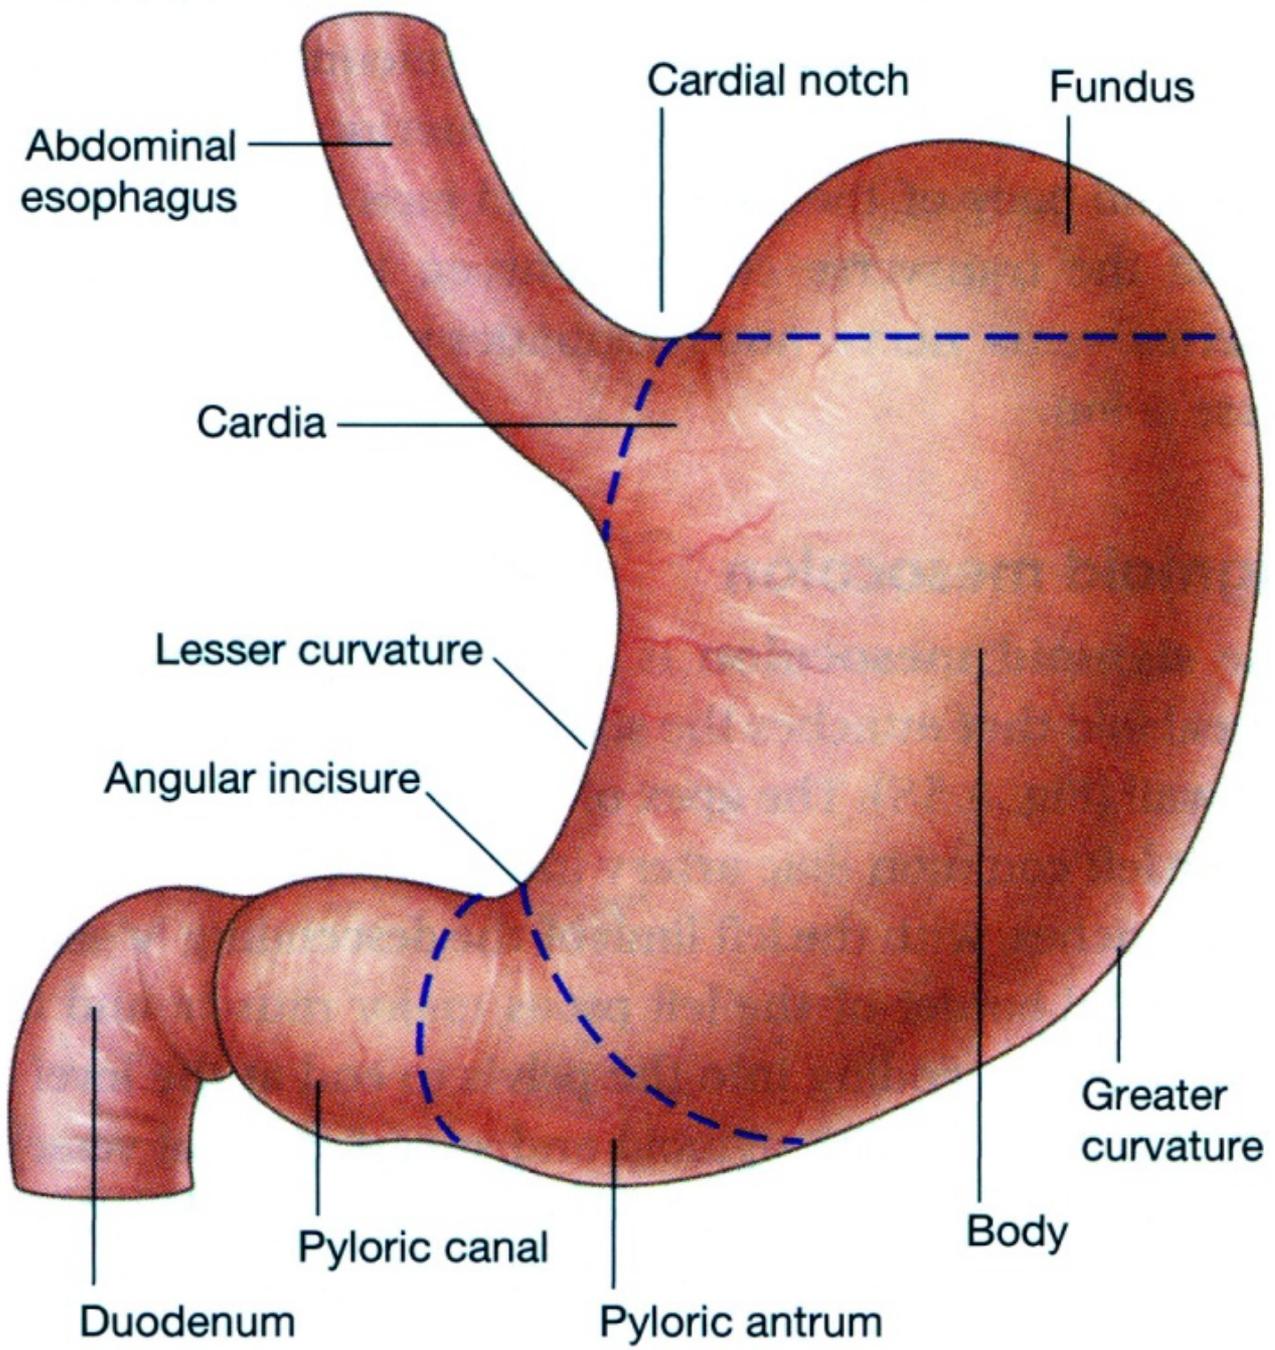

:Pylore

Pyloric antrum

Pyloric canal

Pyloric sphincter

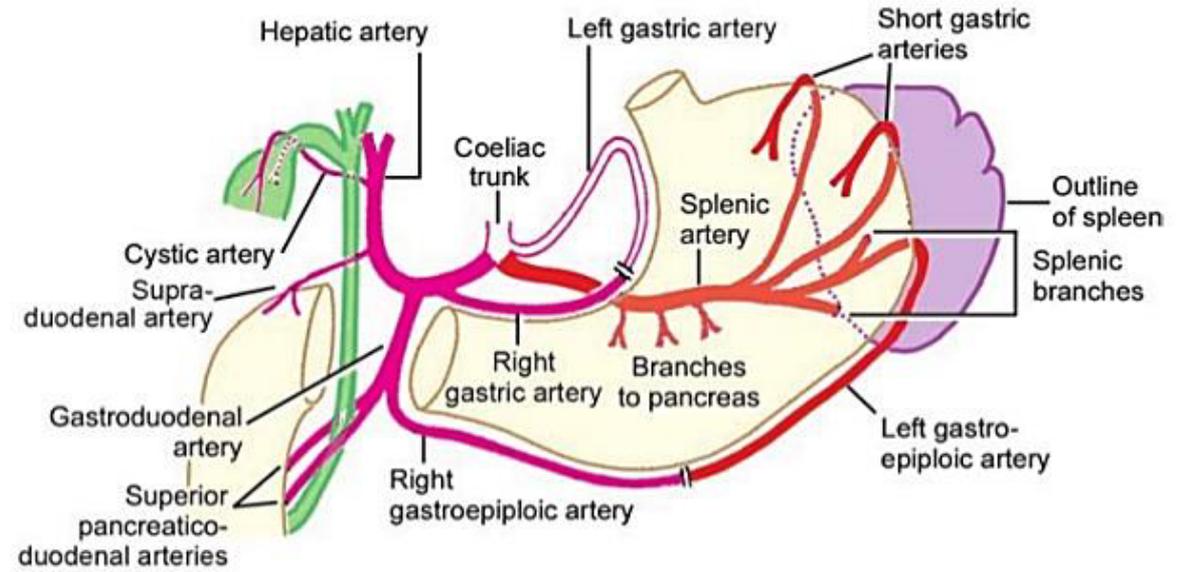

Artery:

Coeliac trunk

Vein:

Portal vein

29.3: Scheme to show the distribution of the hepatic and splenic arteries

Nerve:

Sympathetic: T6-T10 / vasomotor / constriction of pyloric sphincter / pain
Parasympathetic: vagus : muscle constriction / secretion of HCL / pepsin
